

## How to format the chart you created for the example question:

Your chart currently looks like this:

### 1. Change the title to a more descriptive title (The Effect of \_\_\_\_ on \_\_\_\_).

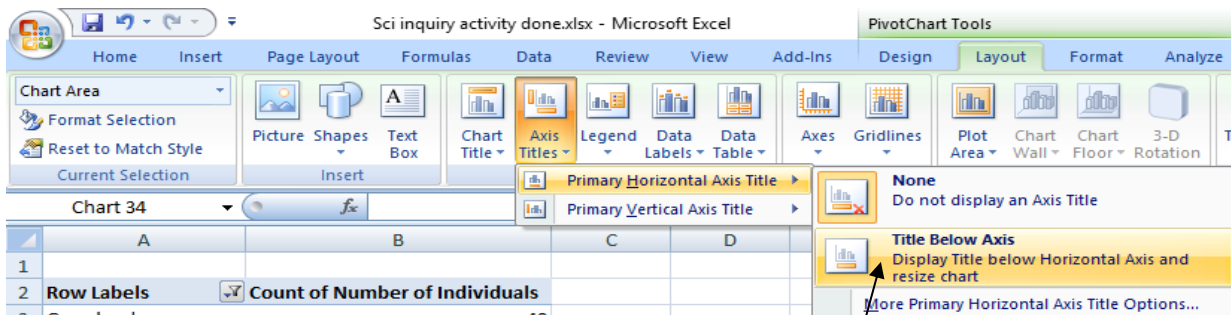

- Click on the chart to select it.
- Click on the current title, highlight and delete the existing text, and type the new title in the box:  
**The Effect of Vegetation Type on the Total Number of Animals Photographed** (you can change the font size and the size and position of the text box to fit the title above the graph)

### 2. Remove the legend:

- Click on the graph to select it. Choose the **Layout** tab.
- Select the **Legend** drop down menu.
- Choose "**None. Turn off legend**"

### 3. Label the axes:

- Click on the graph to select it. Choose the **Layout** tab.
- Select the **Axis Titles** drop down menu.
- Choose **Primary Horizontal Axis Title** and **Title Below Axis**
- Change the x-axis title to **Vegetation Type**
- From the **Axis Titles** drop down menu, choose **Primary Vertical Axis Title** and **Rotated Title**
- Change the y-axis title to **Total Number of Animals**

### How to format the chart you created for your research question:

1. Change the title to a descriptive title using the model: The Effect of \_\_\_\_\_ on \_\_\_\_\_.
2. Remove the legend if it is not needed. Ask if you are not sure.
3. Label the axes. **Include units!**
